Dear:

The American Technion Society and the Technion-Israel Institute of Technology thank you for your generous contribution of \$_____.

Upon her official statehood, Albert Einstein observed, "Israel can win the battle for survival only by developing expert knowledge in technology." As Israel's first university, the Technion has embodied this philosophy, educating generations of students who helped build the nation's infrastructure, defense, and water delivery systems. As Israel and its institutions have evolved, Technion professors, students and researchers have played a critical role in transforming the nation's economic base from agriculture to cutting-edge science and technology. This success – highlighted by two of its professors being awarded Israel's first Nobel Prize in Science – has earned the Technion an international reputation as "Israel's M.I.T." It is truly the only institution of its kind in the Middle East!

The world-changing discoveries of tomorrow are being developed today at the Technion. From nanotechnology to stem cell research to better treatments for Parkinson's disease and cancer, your generous donation will help make these discoveries possible, while also helping Israel defend, strengthen, and advance itself.

Thank you again for your contribution and for demonstrating through your generous deed that private support for a world-class institute like the Technion can and will make a difference.

Sincerely,

Jessica Feldan
Director, South Palm Beach Chapter

Please note that an official receipt will be forthcoming from our National Office before the end of the year.
